BGSF, Inc., headquartered in Plano, Texas, provides staffing services to a variety of industries through its commercial, multifamily, and professional staffing operating segments. BGSF has integrated eight US temporary staffing brands.

### Key Investment Considerations:

**Maintaining Speculative Buy rating and 12-month price target of \$20.50 per share.**

**BGSF has positioned its light industrial, professional, and real estate segments to grow operations through 2022. The US staffing industry market is projected to reach \$135 billion in 2021, up from approximately \$121.5 billion in 2020.**

**In 2H20, BGSF restructured its real estate operations by integrating its multifamily and talent leadership teams. In 2021, this combination began to create new business opportunities by equipping the segments' professionals with better processes, training, tracking, and improved audit policies, which should drive year-over-year sales growth of 33% and 18%, respectively in 2021 and 2022 compared to a 29% decline in 2020.**

**Supporting our growth forecast in the company's highest gross margin real estate segment is the reopening of economic activity in the US and 48 real estate locations in operation during the summer of 2021 with at least 54 locations anticipated to be in operation at the start of 2022.**

**BGSF reported 2Q21 EPS (on 8-5-21) of \$0.22 (excludes a contingent consideration gain of \$0.11 per share) on an 18.8% increase in sales to \$74.4 million. In 2Q20, EPS (excluding a net charge of \$0.48) was \$0.01 on sales of \$62.6 million. We projected EPS of \$0.16 on sales of \$73.4 million.**

**We project 2021 EPS of \$0.90 (unchanged) on a 10% increase in sales to \$305.6 million (unchanged). Our revised forecast reflects 1H21 results that excludes a contingent consideration gain of \$0.11 per share.**

**In 2022, we are maintaining our EPS projection of \$1.30 on sales growth of 7.5% to \$328.5 million (unchanged). Our EPS forecast reflects gross margin improvement to 29.2% from an estimated 28.7% in 2021 and operating margin expense of 23.3% compared to 24.4% in 2021 (excludes contingent consideration gain).**

**Please view our Disclosures on pages 14 – 16.**

## ***Appreciation Potential***

**Maintaining Speculative Buy rating and 12-month price target of \$20.50 per share.** Our rating should be supported by a resumption of gross profit growth in 2021 and 2022 stemming from a return to more normal operations and US staffing industry growth that should reach \$135 billion in 2021, up from an estimated \$121.5 billion in 2020.

We forecast gross profit growth of 9.6% in 2022 compared to 14.9% in 2021. In 2020, gross profit decreased 5.5%. The resumption of gross profit growth should be driven by revenue gains in the real estate segment (BGSF's highest margin segment) reflecting an estimated 48 locations in operation at the start of 2H21 with at least 54 locations in operation at the start of 2022.

The comparative peers in the Staffing & Employment Services industry (source: finviz – on 8/9/21) have a forward P/E multiple of 17.6X (unchanged) with a 17.9% EPS growth rate. Based on our 2022 forecast, BGSF's P/E multiple is 10.3X with EPS growth of 44.4% to \$1.30 per share from an estimated \$0.90 per share in 2021 (excludes a contingent consideration gain in 2Q21 of \$0.11 per share).

We anticipate investors are likely to accord BGSF the peer group multiple as its EPS growth of 44.4% is higher than the peer groups' EPS growth of 17.9%. We applied a 17.6X multiple (unchanged) to our 2022 EPS forecast of \$1.30, discounted for execution risk, to obtain a year ahead price target of \$20.50 per share, implying a total (including a 3.6% dividend yield) year-ahead return in excess of 55%.

**In our view this stock is suitable for risk-tolerant investors.** Revenue and earning gains are most vulnerable when the job market is shrinking and will also depend on the successful integration of BGSF's acquisitions, as well as successfully managing liquidity (debt levels and dividends).

## ***Overview***

BGSF, Inc., headquartered in Plano, Texas, is a national provider of temporary staffing services across a diverse set of industries, which operates through the following brands – American Partners, BG Multifamily, Donovan & Watkins, Extrinsic, Instaff, Vision Technology Services, Zycron, L.J. Kushner & Associates, EdgeRock, and Momentum Solutionz. BGSF, Inc. operates within three industry segments: Light Industrial, Professional, and Real Estate (a specialty segment). The company's real estate segment operates in 41 states and the District of Columbia and its light industrial segment operates in seven US states.

The real estate segment provides customers front office and maintenance personnel on a temp and temp-to-direct hire basis to various apartment communities (the multifamily segment) and commercial buildings segment. The division utilizes a centralized recruiting model from recruiting centers in Dallas, Houston, and Austin, Texas, and in Charlotte, North Carolina, and Tampa, Florida. The Light Industrial segment provides temporary workers to distribution and logistics customers needing a flexible workforce (light assembly or manufacturing) and administrative and clerical functions.

## ***Recent Developments***

On August 4, 2021, BGSF, Inc.'s board of directors declared a cash dividend on its common stock of \$0.12 per share to be paid on August 23, 2021 to all shareholders of record as of the close of business on August 16, 2021. This is a 20% increase from the prior common stock dividend of \$0.10 per share declared on May 3, 2021.

In 1H21, the company acquired Momentum Solutionz for \$3.8 million cash and contingent consideration of up to \$2.2 million based on its future performance for two years following the date of acquisition. The company used its credit agreement to fund the acquisition. In 2020, Momentum generated revenue of approximately \$3 million.

The acquisition of Momentum Solutionz is beginning to show results by strengthening the company's information technology (IT) consultants and technology professionals section of the professional services segment. Momentum

contributed approximately \$800,000 in revenue in 2Q21. Momentum provides workforce solutions to clients throughout the US in industries such as hospitals, retail, universities, and mid-size businesses.

### ***COVID-19 Pandemic Response***

In 2H20, the company's light industrial segment experienced improved operating performance due primarily to warehouse labor shortages stemming from a significant shift to online shopping during the COVID-19 pandemic environment. While the professional services segment has streamlined its operations, it has also experienced increased customer activity due primarily to higher demand from client partners moving their operations to cloud computing particularly as employees are working from home due to the COVID-19 pandemic environment. To maintain and service its customers the company has begun an education and market survey program in order to identify and show its clients what the needs will be to hire temporary workers.

In 3Q20, BGSF restructured its real estate segment operations by integrating its multifamily and talent leadership teams. This combination should open new market and business opportunities to equip the segments' professionals with better processes, training, tracking, and improved audit policies, which should drive a resumption of sales growth for the real estate segment in 2021 and 2022.

### ***Growth Strategy***

#### *Technology Roadmap*

The primary goal of the company is to develop technology that will reduce cycle time to fill client orders and onboard applicants, improved internal operations through automation and scalability, and implement secure cloud solutions.

By the end of 2020, the company completed 14 technology projects out of the 21 identified in 2019. Over the next two years, the company aims to make significant progress on completing the remaining seven projects, including those to improve payroll and human resource systems, as well as implementing a new client contract management system that is aimed at increasing the speed and compliance to which new business contracts are executed. Other projects include enhancing the applicant tracking system, transitioning its data center to the cloud, and increasing cybersecurity.

#### *Going Virtual*

The stay at home orders stemming from the COVID-19 pandemic resulted in the company launching its first ever companywide cross sales training and virtual meeting.

In April 2020, the company began training its team members on holding virtual sales meetings and interviews. In May 2020, BGSF began conducting Webinars in its professional brands with record attendance and its social media education and outreach programs have expanded.

In 2021, the company's technology platforms should be able accommodate a new environment where companies allow their employees to work from a remote location or a combination of working in person and remotely (the new hybrid work model). To that end, a majority of BGSF's teams have returned to the office on a hybrid basis while the company continues to monitor the ongoing COVID-19 pandemic conditions. In 2Q21, the company began to see more a return to a more traditional way of doing business. However, it anticipates virtual connections will be heavily used going forward with the digital transformation becoming an important factor in finding and engaging with clients.

#### *Cross selling*

The company aims to increase cross selling opportunities within and between its three operating segments. The company anticipates it can generate 8% of total revenues from cross selling, which should comprise 10% of gross profit in 2021. Helping to drive these initial cross selling results was the 1Q21 acquisition of Momentum Solutionz. Momentum's expertise fits into its professional segment IT solutions segment and should be able to support broad opportunities to cross sell that segments' capabilities within BGSF's current client partner base. In 1H21, the

company's cross selling initiatives within its professional services segment contributed 11.4% and 11.7% of segment sales and gross profit, respectively.

## ***Projections***

### ***Basis of Forecast***

Our forecast reflects the streamlining and positioning of the company's operations during the worst of the COVID-19 pandemic environment. As the company adapts to the COVID-19 environment, we anticipate sustained growth in operations through our forecast period. We also anticipate that a significant portion of the approximately 1,000 open orders should be filled as the company works to educate its customers on how to attract workers in order to fill those job openings that are within the company's light industrial and real estate segments.

### ***Economy***

In July 2021, the International Monetary Fund (IMF) revised its economic growth estimate for the US to an increase of 7% for 2021 and 4.9% for 2022. In April 2021, the IMF projected US economic growth of 6.4% for 2021 and 3.5% for 2022. The IMF increased their forecast due primarily to the impact of the US stimulus package enacted in early 2021 and the reopening of the economy in the spring and summer 2021. A risk to the IMF forecast would be if pending legislation on infrastructure does not get passed by the US Congress.

The advanced estimate of US GDP growth (released on July 29, 2021) showed the US economy increased at an annual rate of 6.5% in 2Q21 compared to a 6.3% gain in 1Q21. 2Q21 growth is up from the worst of COVID-19 pandemic conditions of a 31.4% decline in 2Q20. The 2Q21 increase reflects increases in personal consumption expenditures, nonresidential fixed investment, exports, and state and local government spending, partly offset by decreases in private inventory investment, residential fixed investment, and federal government spending.

The unemployment rate for July 2021 (reported on August 6, 2021) was 5.4% compared to the peak unemployment rate of 14.7% in April 2020. In July 2021, unemployed people in the US were approximately 8.7 million, while the number of employed were 153.6 million (compared to 133.2 million in April 2020). In July 2021, the labor force participation rate remained relatively flat at to 61.7% compared to June 2021, but is still below 63.3% in February 2020.

In June 2021, the Federal Reserve Board issued a forecast that calls for a US unemployment rate of 4.5% and 3.8%, respectively in 2021 and 2022, compared to its March 2021 forecast of 4.5% and 3.92%, respectively in 2021 and 2022.

### ***Operations***

In 2021, we project revenue growth of 10% to \$305.6 million (unchanged). Our forecast does not include potential acquisitions in the company's professional staffing segment. We anticipate the company's three segments (real estate, professional services, and light industrial) should experience growth as pent up customer demand is fulfilled.

We project a 14.9% increase in gross profit to nearly \$87.6 million driven by sales growth and gross margin expanding to 28.7% from 27.4% due primarily to a shift in the sales mix to the company's two higher margin segments (real estate and professional services) as BGSF adapts to the COVID-19 pandemic environment. We anticipate operating income increasing to \$13.2 million (excluding a \$1.2 million contingent consideration gain) from \$10.7 million (excluding \$7.2 million impairment charge and \$76,000 contingent consideration gain) due primarily to revenue growth and gross margin expansion, partly offset by operating margin expense increasing to 24.4% from 23.6% in 2020.

We forecast operating expense to increase 13.9% to \$74.4 million (excluding contingent consideration gain) compared to \$65.5 million (excluding impairment charge and contingent consideration gain) in 2020. We project a 17.1% increase in SG&A to \$70.9 million to support sales growth. D&A expense should decrease to \$3.5 million from \$5 million. We project operating margin of 4.7% vs. 1.3% due primarily to revenue growth and gross margin expansion.

We project a \$234,000 decrease in interest expense to nearly \$1.4 million due primarily to higher annual interest received from the company's workers compensation loss retention program in 2Q21. Our net income forecast (excluding a contingent consideration gain of \$0.11 per share) is \$9.3 million or \$0.90 per share, after income tax expense of \$2.5 million for an income tax rate of 19.2%. We previously forecasted net income of \$9.4 million or \$0.90 per share, after income tax expense of \$3.1 million for an income tax rate of 24.9%.

In 2022, we project revenue growth of 7.5% to \$328.5 million (unchanged). Our forecast does not include potential acquisitions in the company's professional staffing segment. We anticipate the company's three segments (real estate, professional services, and light industrial) should experience growth as pent up customer demand is fulfilled and the company executes on customer cross selling opportunities which should approach 20% of professional service segment sales from an estimated 12% in 2021.

We project a 9.6% increase in gross profit to nearly \$96 million driven by gross margin improvement to 29.2% from an estimated 28.7% in 2021. The gross margin improvement reflects revenue growth from the real estate segment, which should deliver a gross margin of 38.1% and comprise 33% of total sales, up from an estimated 29.9% of total sales in 2021. We anticipate operating income increasing 47% to \$19.3 million from an estimated \$13.2 million (excludes a contingent consideration gain of nearly \$1.2 million) due to revenue growth, gross margin expansion, and operating margin expense improving to 23.3% from an estimated 24.4% in 2021 (excluding the contingent consideration gain).

We forecast operating expense to increase 2.9% to \$76.6 million compared to an estimated \$74.4 million (excluding contingent consideration gain) in 2021. We project a 3.7% increase in SG&A to \$73.6 million to support sales growth. D&A expense should decrease \$440,000 to nearly \$3.1 million. We project operating margin of 5.9% vs. 4.7% due to higher revenue, increased gross margin, and improvement in operating margin expense.

We project interest expense of \$1.5 million compared to \$1.4 million reflecting a higher average interest rate, partly offset by a lower average debt balance. We project net income of \$13.6 million or \$1.30 per share, after income tax expense of nearly \$4.3 million for an income tax rate of 24%. We previously projected net income of \$13.5 million or \$1.30 per share, after income tax expense of \$4.7 million for an income tax rate of 25.6%.

### Finances

For 2021, we project cash earnings of over \$14.8 million and an increase in working capital of \$4 million due primarily to an increase in receivables and prepaid expenses. Cash from operations of \$10.8 million and borrowings should cover capital expenditures, an acquisition in 1Q21, repayment of principal on debt, and payment of common stock dividends. At the end of 2021, the company's cash balance should remain at zero.

For 2022, we project cash earnings of \$17.6 million and an increase in working capital of \$6.1 million due primarily to increases in receivables and prepaid expenses. Cash from operations of \$11.5 million should cover capital expenditures, repayment of debt, and payment of common stock dividends. At the end of 2022, the company's cash balance should remain at zero.

## ***2Q21 and 1H21 Results***

### 1Q21 Results

Revenues increased 18.8% to \$74.4 million from \$62.6 million in the year-ago period due to an 80.1% increase in real estate segment sales to \$21.2 million and a 19.9% increase in light industrial segment sales to nearly \$17 million. Partly offsetting the revenue increase was a 1.3% decrease in the professional staffing revenue to \$36.2 million.

The 80.1% or \$9.4 million increase in real estate segment sales was due primarily to easing of COVID-19 pandemic conditions. The overall increase reflects a 63.5% increase in billed hours and 10.2% increase in the average bill rate.

The 19.9% or \$2.8 million increase in light industrial segment sales was due primarily to strong demand within the logistics market. The overall increase reflects an 11.2% increase in billed hours and a 7.8% increase in the average bill rate.

BGSF, Inc.

The 1.3% or approximately \$400,000 million decrease in professional staffing segment sales reflects reduced sales from within the company's Information Technology Development division, as well as declines of 4.1% in billed hours and 1.1% in average bill rate. Partly offsetting the decline was a \$1 increase in permanent placements and approximately \$800,000 from the 2021 acquisition of Momentum Solutionz.

Gross profit increased 28.9% to nearly \$21.8 million reflecting gross margin expansion to 29.3% from 27% in 2Q20. The gross profit improvement for the real estate and light industrial segments reflect an easing of COVID-19 pandemic conditions, while the improvement in the professional staffing segment reflects contribution of \$1 million in permanent placements and \$400,000 from the 2021 Momentum Solutionz acquisition.

Gross Profit per segment in Millions	2Q21	2Q20	% D
Light Industrial	2.5	2.0	24.4%
Real Estate	7.9	4.4	76.7%
Professional Staffing	11.4	10.4	9.3%
<b>Gross Profit</b>	<b>\$ 21.8</b>	<b>\$ 16.9</b>	

Operating expenses (excluding a \$1.2 million gain on contingent consideration in the current period and an impairment charge of \$7.2 million in the year-ago period) increased 18.5% to nearly \$18.7 million from nearly \$15.8 million due to a nearly \$3.5 million increase in SG&A to \$17.8 million. The increase in SG&A expense reflects higher compensation costs and the inclusion of Momentum Solutionz operations. Partly offsetting the increase was a \$553,000 decrease in D&A expense to \$891,000 due to the elimination of depreciable assets from the 2015 Vision Technology Services acquisition and the 2020 impairment losses.

In the current period, due to certain business developments, the company recognized a \$1.2 million gain on contingent consideration related to the 2019 LJK acquisition.

In the year-ago period, the company recorded an impairment charge of \$7.2 million due to the company recognizing a \$3.7 million trade name impairment loss and a \$3.5 million client partner list impairment loss.

Operating income (excluding the contingent consideration gain and impairment charge) increased to \$3.1 million compared to \$1.2 million in the year-ago period. The increase in operating income was due primarily to sales growth and gross margin expansion. Operating expense margin (excluding items) was 25.1%, up from 25.2% in 2Q20.

Interest expense was \$219,000, down from \$430,000 due primarily to higher annual interest received from the company's workers compensation loss retention program, and a lower average balance on its revolving credit facility.

Net income was \$3.4 million or \$0.33 per share compared to loss of \$4.8 million or (\$0.47) per share. In 2Q21, we estimated EPS of \$0.22 after excluding the contingent consideration gain compared to EPS of \$0.01 in 2Q20 after excluding an impairment charge and income tax benefit adjustment gain. We estimated EPS of \$0.16 per share on revenue of \$73.4 million.

1H21 Results

Revenues increased 4% to \$142.1 million due to a 25.2% increase in real estate segment sales to \$39.8 million and a 9.7% increase in light industrial segment sales to \$35 million, offset in part by a 7.8% decrease in professional staffing sales to \$67.3 million.

Gross profit increased 9.2% to \$40.6 million reflecting higher sales and gross margin expansion to 28.6% from 27.2% in the year-ago period. The improvement in gross profit was due primarily to the easing of COVID-19 pandemic conditions.

Operating expenses (excluding a \$1.2 million contingent consideration gain in 1H21 and an impairment charge of \$7.2 million in 1H20) increased 8.6% to \$36.2 million from nearly \$33.4 million due to a

Source: company reports

13.1% increase in SG&A expenses to \$34.5 million, partly offset by a \$1.1 million decrease in D&A expense to \$1.8 million.

In the current period, due to certain business developments the company, recognized a \$1.2 million gain on contingent consideration related to the 2019 LJK acquisition.

In the year-ago period, the company recorded an impairment charge of \$7.2 million (pre-tax, or \$5.4 million post-tax) due to the company recognizing a \$3.7 million trade name impairment loss and a \$3.5 million client partner list impairment loss.

Operating income (excluding items) increased to \$4.4 million compared to \$3.8 million in the year-ago period. The increase in operating income was due primarily to sales growth and gross margin expansion.

Interest expense decreased to \$595,000 from \$886,000 in the year-ago period. Net income was \$4.2 million or \$0.40 per share compared to a loss of \$3.3 million or (\$0.32) per share. We estimate EPS excluding items in 1H21 and 1H20, respectively, of \$0.29 and \$0.14.

#### Finances

In 1H21, the company had cash earnings of \$6.1 million and a \$4.3 million increase in working capital. The increase in working capital reflects an increase in receivables, partly offset by an increase in payables and accruals. Cash from operations of \$1.7 million and borrowings covered capital investments including acquisitions, repayment of debt, and common stock dividends. Cash at the end of 1H21 was zero.

#### Capital Structure

At the end of 1H21, the company had total outstanding debt of \$39.9 million. The company's outstanding long-term line of credit was \$11.9 million (net of \$231,000 of deferred finance fees) and term debt was \$28 million (all but \$3.2 million was long-term). The blended interest rate on the credit line and term debt was 2.6% compared to 2.4% 2Q20. The company's debt to equity ratio is 0.6 versus 1 for the industry, indicating that BGSF's leverage is less than other staffing and outsourcing service companies. In 2Q21, the company was in compliance with all of its financial covenants, including a minimum debt service ratio and a senior funded indebtedness-to-EBITDA ratio.

On July 16, 2019, BGSF entered into a credit agreement with BMO Harris Bank, N.A. that matures on July 16, 2024. The credit agreement provides for a revolving credit facility permitting borrowings of up to \$35 million. The credit agreement also provides for a term loan commitment allowing for borrowings not to exceed \$30 million. The term loan can be increased to \$40 million under certain conditions. The credit agreement is secured by a first priority security interest in substantially all tangible and intangible property of BGSF and its subsidiaries. The credit agreement bears interest either at the base rate plus the applicable margin or LIBOR plus the applicable margin. The company will also pay an unused commitment fee on the daily average unused amount on its revolving facility and term loan. The credit agreement contains customary affirmative covenants as well as negative covenants.

In February 2020, BGSF borrowed \$18.5 million from its term loan in conjunction with the closing of the EdgeRock acquisition. In March 2020, in conjunction with the EdgeRock acquisition, the company entered into a standby letter of credit that expires December 31, 2024 for purposes of protecting a lessor against default on lease payments. In 2Q21, the maximum financial exposure from this standby letter of credit is approximately \$100,000, all of which is considered usage against the revolving facility.

In April 2020, the company entered into an interest rate swap agreement with BMO in order to reduce the floating interest rate component on the term loan obligation. The \$25 million amount was effective on June 3, 2020 and designed as a cash flow hedge on the underlying variable rate interest payments against a fixed interest rate that terminates on June 1, 2023. In 2Q21, the interest rate swap instrument was effective.

On February 8, 2021, the company borrowed \$3.8 million on its revolving credit facility in conjunction with the closing of the Momentum Solutionz acquisition.

## ***US Staffing Industry***

The temporary staffing industry supplies businesses with workers for predetermined periods of time to supplement existing staff, enabling customers to minimize the cost and effort of workforce planning. Companies in this industry act as intermediaries since demand for a flexible workforce continues to grow, reflecting competitive and economic pressures to reduce costs and respond to changing market conditions.

In April 2021, Staffing Industry Analysts (SIA) issued a revised growth forecast for the US staffing industry indicating that industry revenue could approximate \$135 billion in 2021 for an 11% increase from an estimated \$121.5 billion in 2020. The forecast includes projected information technology staffing sales to grow 9% in 2021 and 6% in 2022. This segment decreased 5% in 2020.

Industrial staffing sales are forecast to increase 16% after declining 12% in 2020 due primarily to an economic recovery in the manufacturing and hospitality sectors. The report indicated there could be a shortage in industrial staffing caused by skills mismatches and the presence of additional federal unemployment benefits that incentivize candidates to not work.

## ***Competition***

The staffing services market is competitive with limited barriers to entry. Smaller companies such as BGSF face competition from larger organizations that have greater financial and marketing resources. In the staffing industry, price competition for personnel is intense, especially for the company's professional staffing and commercial segments. Key competitive factors in the industry include pay rates, availability of assignments, and the duration of assignments, as well as responsiveness to requests for placement. BGSF's challenge is to place prospective temporary workers quickly by having in place appropriate assignments for qualified temporary workers.

Competition in the staffing services industry is from publicly traded companies such as Ciber, Inc., CDI Corp., Computer Task Group Inc., GeeGroup Inc., Kelly Services, Inc., Kforce Inc., ManpowerGroup Inc., On Assignment, Inc., Resources Connection Inc., Robert Half International Inc., TrueBlue, Inc., and Volt Information Sciences, Inc.

## ***Risks***

### COVID-19 Pandemic

The COVID-19 global pandemic presents concerns that could dramatically affect the company's ability to conduct normal business operations effectively.

### Economy

Slowing US economic growth or an unprecedented halt to economic activity would likely reduce customer demand for workforce solutions. Revenue growth for BGSF, Inc. is most vulnerable when US employment is at an inflection point (a reversal from peak employment and a low unemployment rate, or a reversal from a high unemployment rate).

### Revenue concentration

In 2Q21, two states (Texas – 28% and Tennessee – 11%) accounted for 39% of the company's revenues compared to 38% (Texas – 25% and Tennessee – 13%) in the year-ago period. If economic conditions deteriorate in any of these regions, the company's operations could be restrained.

### Integration

The company's business strategy includes acquisitions that expand its geographic locations in the US and the skills offered to customers, which could raise integration issues.

### Interest rates

The Federal Reserve is maintaining interest rates at virtually zero since 2Q20. However, further changes to interest rates are likely to depend on economic conditions stemming from the COVID-19 pandemic. If economic growth and

inflation were to accelerate, it is likely interest rates could increase, which would further increase the company's variable rate term loan and revolving credit facility.

#### Regulation

The company is subject to Federal and state labor and employment laws and regulations. The cost to comply or the inability to comply with such laws and regulations could disrupt operations or increase costs.

#### Workers compensation

The company provides workers' compensation insurance for its temporary workers. While the policies are renewed annually in 1Q, there can be uncertainty in obtaining appropriate types or levels of insurance in the future or that adequate replacement policies will be available on acceptable terms. The loss of workers' compensation insurance coverage would prevent the company from doing business in the majority of its markets.

#### Seasonality

Operations are affected by billing days in a quarter and the seasonality of a customers' business. Demand for BGSF's commercial segment increases in the second and third quarters, peaking in the fourth quarter, and slowing in the first quarter due primarily to customer shutdowns and winter weather conditions. In addition, the cost of services typically increases in the first quarter due primarily to the reset of payroll taxes.

#### Shareholder Control

Officers and directors and one large shareholders collectively own 12% of the outstanding voting stock (as of the SEC filing in June 2021). This group could potentially influence the outcome of matters requiring stockholder approval, which may or may not be in the best interests of the other shareholders.

#### Miscellaneous Risk

The company's financial results and equity values are subject to other risks and uncertainties, including competition, operations, financial markets, regulatory risk, and/or other events. These risks may cause actual results to differ from expected results.

#### Trading Volume

During the last three months to August 9, 2021, average daily volume was 79,100 compared to average daily volume of 82,800 in 2020. The company has a float of 10 million shares and shares outstanding of approximately 10.3 million.

### **General Disclosures**

The information and statistical data contained herein have been obtained from sources, which we believe to be reliable but in no way are warranted by us as to accuracy or completeness. We do not undertake to advise you as to changes in figures or our views. This is not a solicitation of any order to buy or sell. Taglich Brothers, Inc. is fully disclosed with its clearing firm, Pershing, LLC, is not a market maker and does not sell to or buy from customers on a principal basis. The above statement is the opinion of Taglich Brothers, Inc. and is not a guarantee that the target price for the stock will be met or that predicted business results for the company will occur. There may be instances when fundamental, technical and quantitative opinions contained in this report are not in concert. We, our affiliates, any officer, director or stockholder or any member of their families may from time to time purchase or sell any of the above-mentioned or related securities. Analysts and members of the Research Department are prohibited from buying or selling securities issued by the companies that Taglich Brothers, Inc. has a research relationship with, except if ownership of such securities was prior to the start of such relationship, then an Analyst or member of the Research Department may sell such securities after obtaining expressed written permission from Compliance.

**Public Companies mentioned in this report:**

Ciber, Inc.	(NYSE: CBR)	CDI Corp.	(NYSE: CDI)
Computer Task Group Inc.	(NYSE: CTG)	Kelly Services, Inc.	(NASDAQ: KELYA)
Kforce Inc.	(NASDAQ: KFRC)	Resources Connection Inc.	(NASDAQ: RECN)
GeeGroup Inc.	(NYSE MKT: JOB)		

**Meaning of Ratings**

**Buy** – The growth prospects, degree of investment risk, and valuation make the stock attractive relative to the general market or comparable stocks.

**Speculative Buy** – Long-term prospects of the company are promising but investment risk is significantly higher than it is in our BUY-rated stocks. Risk-reward considerations justify purchase mainly by high risk-tolerant accounts. In the short run, the stock may be subject to high volatility and could continue to trade at a discount to its market.

**Neutral** – Based on our outlook the stock is adequately valued. If investment risks are within acceptable parameters, this equity could remain a holding if already owned.

**Sell** – Based on our outlook the stock is significantly overvalued. A weak company or sector outlook and a high degree of investment risk make it likely that the stock will underperform relative to the general market.

**Discontinued** – Research coverage discontinued due to the acquisition of the company, termination of research services (includes non-payment for such services), diminished investor interest, or departure of the analyst.

**Some notable Risks within the Microcap Market**

**Stocks in the Microcap segment of the market have many risks that are not as prevalent in Large-cap, Blue Chips or even Small-cap stocks. Often it is these risks that cause Microcap stocks to trade at discounts to their peers. The most common of these risks is liquidity risk, which is typically caused by small trading floats and very low trading volume which can lead to large spreads and high volatility in stock price. In addition, Microcaps tend to have significant company-specific risks that contribute to lower valuations. Investors need to be aware of the higher probability of financial default and higher degree of financial distress inherent in the microcap segment of the market.**
