*Includes a per share charge of (\$0.68) related to preferred dividends, a \$0.29 per share gain related to fair value of warrant liabilities, and \$0.27 per share gain related to government grant income. **Includes an estimated (\$0.99) per share of net charges after grant income. ***Excludes an estimated \$0.27 per share gain related to fair value of warrant liabilities.

Bridgeline Digital, Inc., headquartered in Woburn, Massachusetts helps companies grow online revenues by increasing their traffic, conversion rate, and average order value with its eCommerce360 digital engagement offerings that include Celebros Search, Unbound, OrchestraCMS, Woorank, and HawkSearch.

Key Investment Considerations:

Maintaining Speculative Buy rating but reducing our 12-month price target to \$3.25 per share from \$4.00 due to reductions in sector multiples and our FY23 revenue per share forecast.

Brideline Digital has substantial growth potential for its eCommerce360 digital engagement offerings through its sales and marketing strategy that enables a streamlined and nearly virtual sales process via an artificial intelligence (AI) dashboard. Analysts project the global customer experience management market growing 18.1% annually to approximately \$39 billion by 2030, up from \$8.8 billion in 2021.

BLIN's eCommerce360 growth strategy was enhanced by acquiring Woorank and HawkSearch in FY21. The company anticipates it will increase spending on R&D and sales and marketing initiatives through our forecast period in order to support recurring subscription revenue growth.

In 2Q22, BLIN reported (on 5-12-22) EPS of \$0.03 on revenue of \$4.1 million. In 2Q21, the loss per share was (\$0.11) on revenue of \$2.9 million. Excluding items, we estimate the loss per share was (\$0.01) compared to a loss per share of (\$0.03) in 1Q21. We projected a loss per share of (\$0.06) on revenue of \$4.2 million.

For FY22, we project a loss per share of (\$0.18) on revenue growth of 26.1% to \$17 million (prior was \$17 million), which includes 34.9% growth in subscription revenue to \$13.4 million. We previously estimated a loss per share of (\$0.01). Our revised forecasts reflect 1H22 results, higher than anticipated operating costs, and excludes a gain of approximately \$0.27 per share from a change in fair value of warrant liabilities.

For FY23, we project a loss per share of (\$0.10) on revenue growth of 12.4% to \$18.8 million, driven by subscription growth of 14.9% to \$15.5 million (prior was \$16.2 million). We previously forecast revenue of \$19.8 million and a loss per share of (\$0.02). Our revised forecast reflects slower recurring revenue growth and gross margins of 70.3% (prior was 72.3%) compared to an estimated 68.5% (prior was 70.2% in FY22).

Please view our disclosures on pages 14 – 16.

Appreciation Potential

Maintaining Speculative Buy rating but reducing our 12-month price target to \$3.25 per share from \$4.00 due to reductions in sector multiples and our FY23 revenue per share forecast.

Our rating reflects projected recurring revenue growth from the FY21 acquisitions of Woorank and HawkSearch and the integration of their offerings into BLIN's eCommerce360 offerings. Entering 2H22, the company's cash on hand of \$4.9 million provides it with the ability to pay the contingent consideration owed to the principles of Woorank and HawkSearch, as well as planned increases in R&D and sales and marketing spending on initiatives that should help drive recurring subscription revenue through our forecast period.

Our 12-month price target of \$3.25 per share implies shares could increase nearly 150% over the next twelve months. According to finviz.com (as of 05/17/22), the average trailing twelve month price-to-sales multiple for companies with similar market capitalizations in the Software Application/Infrastructure and Internet Content sectors is 2.7X (prior was 2.9X), compared to BLIN's trailing twelve month price-to-sales multiple of 0.7X (prior was 1X). We anticipate investors are likely to accord Bridgeline Digital, Inc. a multiple approaching that of the sector given our forecasted recurring subscription sales growth of 14.9% in FY23. We applied a price-to-sales multiple of 2.2X (prior was 2.6X) to our FY23 sales per share forecast of \$1.78 (prior was \$1.88), discounted for execution risk, to obtain a year-ahead price target of approximately \$3.25 per share.

BLIN's valuation improvement is contingent upon consistent quarterly recurring-SaaS/perpetual software revenue growth, expense leverage, and cash earnings. We forecast the company generating annualized recurring-SaaS/perpetual software revenue growth of 27.3% to FY23 from FY20 and cash earnings of \$647,000 in FY23 compared to an estimated cash burn of \$454,000 in FY22.

We believe Bridgeline Digital, Inc. is most suitable for risk tolerant investors that seek exposure to a microcap company providing digital engagement services through recurring subscription revenue offerings and enterprise platform software for its customers.

Overview

Bridgeline Digital, Inc., headquartered in Woburn, Massachusetts is a digital engagement company that assists customers in maximizing the performance of their digital experience from Websites and intranets, to online stores and marketing and promotional campaigns. The company's platform integrates Web content management, eCommerce, marketing automation, site search, authenticated portals, social media management, as well as translation and Web analytics to help organizations deliver enhanced digital experiences. The technology offerings from the Woorank and HawkSearch acquisitions in FY21 are being integrated into, and broaden, BLIN's existing offerings.

The Bridgeline platform powers Websites, online stores, portals and intranets for thousands of customers that range from small and medium-sized organizations to Fortune 1000 companies. The company's primary customer verticals are franchises, healthcare, manufacturing, finance, and primarily online retailers.

Platform Offerings

The company's primary technology has evolved over the last five years into eCommerce360 AI powered technology offerings that have been strategically designed to bridge the gap between Web content management, eCommerce, eMarketing, and social and Web analytics by providing all of these components in one unified and deeply integrated platform. The technology platform provides professional services to customers that enable them to support their customers in driving lead generation, increased revenue, improved customer service and loyalty, as well as enhanced employee knowledge, and reduced operational costs.

The chart to the right shows the various components of the eCommerce360 offerings. The offerings can be purchased through a cloud-based software-as-a-service (SaaS) recurring revenue model. BLIN has developed the platform with a flexible architecture that provides customers with state-of-the-art deployment, recurring maintenance, and daily technical operation and support. The offering can be purchased as a perpetual license in which the software resides on a dedicated infrastructure in either the customer’s facility or managed and hosted by BLIN via a cloud-based hosted services model. Regardless of which model is used by the customer, this offering will likely require customization, thus providing BLIN with digital engagement services revenue.

Recurring revenue is provided by its eCommerce360 franchise offering that empowers large franchises, healthcare networks, associations and chapters, as well as other multi-unit organizations to manage branded networks to unify, manage, scale and optimize a hierarchy of Web properties and marketing campaigns on a global, national and local level. The platform has an easy-to-use administrative console that enables corporate marketing to provide consistency in branding and messaging, as well as providing flexible publishing capabilities at the local-market level.

The eCommerce360 offerings are powered by the company’s Celebros Search technology platform that is sold and delivered through a cloud-based SaaS recurring revenue model that is primarily an out of the box offering that requires very little customization. The offering is primarily a commerce site search product that provides for Natural Language Processing with artificial intelligence to present very relevant search results based on long-tail keyword (search that is usually longer as they are more specific) searches in seven languages. The company has developed Celebros Search plug-ins that can be utilized by Bridgeline’s Unbound Commerce offering in addition to many third-party Commerce platforms such as Magento, Shopify, Salesforce, etc.

HawkSearch, acquired in 3Q21, will enhance BLIN’s e-commerce and enterprise site search offerings as its AI technology is aimed at enhancing a customer’s merchandising capabilities, product recommendations, and personalization based on data rich search analytics. Their offerings will be integrated into BLIN’s Celebros Search technology platform.

The Woorank offering assists companies in increasing their online traffic, leads, and sales with an artificial intelligence system that analyzes their website relative to their competitors and partners to make intelligent recommendations for optimizing search engine organic rankings.

Growth Strategy

In FY20, the company’s growth strategy evolved into eCommerce360, in which its sales organization is a combination of telephone sales, partnerships in online marketplaces, and artificial intelligence dashboards that provide touchless sales opportunities. In FY22, the company enhanced its new customer acquisition strategy through the engagement and development of a partner network primarily through independent software vendors and marketing agencies such as Americaneagle.com and X-engage. The overall strategic shift is enabling BLIN to streamline its sales and marketing organization that should drive increasing sales and shorter sales cycles for higher margin subscription revenue. BLIN’s goal is to achieve a total revenue mix of 85% subscriptions and 15% digital engagement services.

The company has deployed its technology team to merge Celebros and HawkSearch into one single product. That combined product will provide customers with a single technology that offers natural language processing, personalization, and recommendation capabilities. The company anticipates it can build its current Celebros and

HawkSearch site search customer base of at least 400 in 1Q22. Recurring revenue growth for this combined offering should exceed 20% annually.

The overall measure of the company executing on its strategy with higher margin out-of-the-box tools will be if customers can increase their site traffic, shopper conversion rate, and average order value. In 2Q21, the acquisition of Woorank increased BLIN's customer base, as well as enhanced its eCommerce360 opportunity to new customer leads. In 3Q21, Bridgeline released e-commerce 360 dashboards within its HawkSearch and Woorank product lines.

A unique feature of Woorank's and BLIN's offerings is a dashboard powered by an artificial intelligence algorithm that provides existing customers with recommendations to purchase additional eCommerce360 offerings that can increase their return on investment. A small section of the Dashboard provides popups on what additional offerings should be purchased in order to improve a customers' online sales, customer acquisition and retention performance. In 3Q21, the company introduced the Woorank assistant that incorporates an artificial intelligent agent that monitors a customer's global Web vitals and makes recommendations to drive site traffic and increase their Google ranking.

The company's new DataBravo offering, which mines search engine optimization (SEO) content accumulated by WooRank, is anticipated to gain customer acceptance over time as it provides customers with analytical insights in order to enhance their decision making process.

Acquisitions

In FY19, the company acquired Celebros Search and OrchestraCMS. In FY21, BLIN acquired Woorank and HawkSearch. The company continues to evaluate strategic merger and acquisition opportunities to enhance the growth potential of its recurring subscription revenue strategy. BLIN will target technology offerings that are established within an existing online marketplace, generate revenue of at least \$2 million, and are accretive to cash earnings. An acquired technology will be integrated into the company's offerings and artificial intelligence recommendation dashboard algorithm.

Industry Brief

Experience Management Market

In February 2022, consulting firm Grand View Research issued a report stating that the global customer experience management market generated revenue of nearly \$8.8 billion in 2021. Grand View Research predicts annualized revenue growth of 18.1% to approximately \$39 billion in 2030 due primarily to increasing demand for personalized experiences by customers across different industries. The report observes that customer experience management represents an evolving set of practices and technologies that make a continuous transformation within organizations in order to meet and exceed consumer expectations. Business organizations understand the importance of customer experience management (like BLIN's eCommerce360 technology offerings) since it assists organizations in strengthening their brand presence, improves consumer loyalty, reduces consumer churn, and in turn, boosts business revenue. The report indicated that the US customer experience management market generated revenue of \$2.9 billion in 2021 with a prediction of annualized revenue growth of 15.3% reaching approximately \$9 billion by 2030.

Projections

Basis of Forecast

We anticipate BLIN's primary growth drivers will be recurring revenue from its HawkSearch technology offering that is merging with the company's own Celebros Search offering, as well as recurring revenue sales from its acquisition of Woorank with additional sales coming from the company's portfolio of individual Apps to enhance each customer's content management experience and steady enterprise platform sales and associated digital engagement services. Entering 2H22, the company's Celebros and HawkSearch customer base exceeds 400.

We anticipate Woorank continuing to deliver approximately ten new customers per day along with 1,500 qualified sales leads per month. A portion of those monthly leads are likely to convert to the HawkSearch/Celebros Search offering as the combined offering should provide customers with enhanced merchandising capabilities, product recommendations, personalization, and data rich search analytics.

In FY22 (ended September 30), we anticipate gross margin expansion to 68.5% compared to 65.8% in FY21. Gross margin expansion stems from the product mix shift to higher margin subscription and perpetual license revenue that should account for 80.4% of total sales compared to 75.1% in FY21. We forecast gross margin improving to 70.3% in FY23 due primarily to increased sales of higher margin subscription and perpetual license revenue that should account for 82.2% of total sales by September 30, 2023.

Our forecast does not include changes in the fair value of warrant liabilities or income tax expense until reported by the company. At September 30, 2021, BLIN had federal and state net operating loss carryforwards of approximately \$32 million and \$30 million, respectively.

Economy

In April 2022, the International Monetary Fund (IMF) revised its global economic growth estimates to an increase of 3.6% for 2022 and 2023, down from its January 2022 projection calling for 4.6% growth in 2022 and 3.8% growth in 2023. The downward revisions primarily reflect the economic damage from the war in Ukraine resulting in elevated inflation and rising interest rates.

The IMF revised its economic growth estimate for the US to an increase of 3.7% for 2022 and 2.3% for 2023. In January 2022, the IMF projected US economic growth of 4% and 2.6% for 2022 and 2023, respectively.

Operations – FY22

We project 26.1% total revenue growth to \$16.7 million (prior was \$17 million) from \$13.3 million in FY21 due primarily to 34.9% growth in recurring subscription (SaaS) and perpetual licenses revenue to \$13.4 million (prior was \$13.6 million), up from nearly \$10 million in FY21. We anticipate digital engagement services revenue flat at \$3.3 million. Our revenue forecast reflects a full year of revenue contributions from HawkSearch and Woorank and a one-time perpetual license of \$65,000 in 1Q22.

We forecast gross profit increasing 31.3% to nearly \$11.5 million compared to \$8.7 million in FY21 due to revenue growth and gross margin expanding to 68.5% from 65.8% in FY21. We project an operating loss of \$2.2 million (excludes \$164,000 in restructuring and acquisition related costs) compared to operating income of \$52,000 (excludes \$1.2 million in restructuring and acquisition related costs) in FY21. The operating loss reflects an increase in operating margin expense to 81.5% from 65.4% (excluding restructuring and acquisition related expenses in each period).

We project a 57.1% increase in operating expenses to \$13.6 million (excludes \$164,000 in restructuring and acquisition related costs) compared to nearly \$8.7 million (excluding \$1.2 million in restructuring and acquisition costs) in FY21. The increase reflects costs to support sales and marketing initiatives, as well as technology improvements in order to accelerate growth of the company's product offerings. We anticipate sales and marketing expense nearly doubling to \$5.3 million from \$2.7 million in FY21 stemming from hiring additional sales and marketing professionals and initiating new marketing initiatives such as the engagement of independent software vendors and marketing agencies. We forecast a 43.4% increase in R&D expense to \$3.4 million as the company invests in merging the HawkSearch offering with BLIN's existing Celebros offering. G&A expense should increase 36.8% to nearly \$3.2 million from \$2.4 million last year, which reflects the operations of two acquisitions in FY21. We anticipate D&A expense of \$1.7 million compared to \$1.2 million in FY21.

We project non-operating income of \$3.3 million that includes positive changes in fair value of warrant liabilities of \$2.9 million and \$474,000 in fair value of contingent consideration, partly offset by \$39,000 in interest expense. In FY21, non-operating expense was \$6.7 million due primarily to the change in fair value of warrant liabilities.

We project net income of \$969,000 or \$0.09 per share. Our forecast includes gains of \$3.3 million or \$0.32 per share from change in fair value of warrant liabilities and contingent consideration that was reported in 1H22. We previously forecast a net loss of \$123,000 or (\$0.01) per share

Finances – 2022

We project cash burn of \$454,000 and a \$154,000 decrease in working capital resulting in cash used in operations of \$300,000. Cash used in operations capital expenditures, repayment of debt, and payment of contingent consideration that should result in cash decreasing by nearly \$4.7 million to \$4.2 million at September 30, 2022.

Operations – FY23

We project 12.4% total revenue growth to \$18.8 million from an estimated \$16.7 million in FY22 due primarily to 14.9% growth in recurring subscription (SaaS) and perpetual licenses revenue to nearly \$15.5 million, up from an estimated \$13.4 million in FY22. We anticipate digital engagement services revenue increasing by \$70,000 to nearly \$3.4 million. Our reduced revenue forecast reflects unanticipated customer attrition of the company's legacy offerings, partly offset by recurring revenue growth from newer HawkSearch and Woorank product offerings.

We forecast gross profit increasing 15.3% to \$13.2 million compared to an estimated \$11.5 million in FY22 due to revenue growth and gross margin expanding to 70.3% from an estimated 68.5% in FY22. We project an operating loss of nearly \$1.1 million compared to an estimated operating loss of \$2.3 million in FY22. The narrowing of our operating loss forecast reflects an improvement in operating margin expense to 75.9% from an estimated 81.5% (excludes \$164,000 in restructuring and acquisition expenses) in FY22.

We project operating expenses increasing 4.8% to \$14.3 million compared to \$13.6 million (excluding \$164,000 in restructuring and acquisition expenses) as increases in sales and marketing and G&A expenses are likely to be partly offset by a reduction in D&A expenses. The level of operating expenses should continue to support initiatives to grow the company's customer base. We anticipate sales and marketing expense increasing \$702,000 to \$6 million and G&A expense increasing \$157,000 to \$3.4 million. D&A expenses should decrease to \$1.5 million from an estimated \$1.7 million in FY22. R&D expense should be flat at \$3.4 million.

We project non-operating expense of \$8,000 related to interest expense compared to non-operating income of \$3.3 million that includes positive changes in fair value of warrant liabilities of \$2.9 million and \$474,000 in fair value of contingent consideration, partly offset by \$39,000 in interest expense. We project a net loss of \$1.1 million or (\$0.10) per share. We previously projected a net loss of \$160,000 or (\$0.02) per share.

Finances – 2023

We project cash earnings of \$647,000 and an \$828,000 decrease in working capital resulting in cash from operations of nearly \$1.5 million. Cash from operations is unlikely to cover capital expenditures and payment of contingent consideration and debt, decreasing cash by \$1.7 million to \$2.5 million at September 30, 2023.

2Q22 and 1H22 Results

2Q22

The company reported a 43.2% increase in total net revenue to \$4.1 million from nearly \$2.9 million in 2Q21. Subscription and perpetual license sales increased 66.2% to \$3.3 million compared to nearly \$2 million in the year-ago period due primarily to multi-year license renewals and the inclusion of revenue from acquisitions completed in FY21. Digital engagement service revenue decreased \$74,000 to \$811,000.

Gross profit increased 53.9% to \$2.8 million from \$1.8 million in the year-ago period. The increase reflects gross margin expansion to 67.6% from 62.9% in the year-ago period due primarily to a shift in the product mix toward higher margin recurring license revenue. Operating expenses increased to nearly \$3.4 million (includes \$66,000 in restructuring and acquisition related charges) from \$1.9 million (includes \$84,000 in restructuring and acquisition related charges) in 2Q21. Sales and marketing expense more than doubled to nearly \$1.3 million from \$524,000 due primarily to an increase in personnel to support marketing programs to drive sales growth. G&A expense increased to \$775,000 from \$608,000 due primarily to expanded operations stemming from the FY21 acquisitions of HawkSearch and Woorank. R&D expense increased to \$865,000 from \$479,000 due primarily to additional research and development expenses related to FY21 acquisitions. D&A expense increased to \$416,000 from \$240,000 stemming from the amortization of intangible assets related to the prior year acquisitions.

The company reported an operating loss was \$606,000 compared to a loss of \$128,000 in 2Q21.

Non-operating income was \$957,000 compared to an expense of \$422,000. Non-operating income included a positive change in the fair value of warrant liabilities to \$434,000 compared to a negative change of \$418,000. Interest and change in fair value of contingent consideration was a positive \$523,000 compared to a negative \$4,000 in the year-ago period.

Net income was \$346,000 or \$0.03 per share compared to a net loss of \$557,000 or (\$0.11) per share. Excluding the change in fair value of contingent consideration and change in fair value of warrant liabilities, the net loss per share was approximately (\$0.06) compared to a loss per share of approximately (\$0.03) after excluding change in fair value of warrant liabilities in the year-ago period. We projected a loss per share of (\$0.06) on sales of \$4.2 million.

1H22 Results

The company reported a 47.2% increase in total net revenue to \$8.4 million from \$5.7 million in 1H21. Revenue growth was driven by a 68.6% increase in subscription and perpetual license sales to \$6.7 million due primarily to multi-year license renewals and the inclusion of revenue from acquisitions completed in FY21, as well as a \$65,000 in a one-time perpetual license sale.

Gross profit increased 57% to \$5.8 million from \$3.7 million in the year-ago period. The increase reflects gross margin expansion to 68.9% from 64.6% in the year-ago period due primarily to a shift in the product mix toward higher margin recurring license revenue. Operating expenses increased to \$6.9 million (includes \$164,000 in restructuring and acquisition related charges) from \$3.6 million (includes \$294,000 in restructuring and acquisition related charges) in 1H21. The increase in operating expenses stems from the FY21 acquisitions of HawkSearch and Woorank.

The company reported an operating loss of nearly \$1.1 million compared to operating income of \$52,000 in 1H21.

Non-operating income was \$3.3 million compared to an expense of nearly \$1.8 million. Non-operating income included a positive change in the fair value of warrant liabilities to \$2.4 million compared to a negative change of \$1.9 million in 1H21. Interest and change in fair value of contingent consideration was a positive \$435,000 compared to \$2,000 in the year-ago period. The year-ago period included government grant income of \$88,000 stemming from the forgiveness of PPP loans received during the COVID-19 pandemic.

Net income was \$2.2 million or \$0.21 per share compared to a net loss of \$1.7 million or (\$0.36) per share. Excluding items, the loss per share was approximately (\$0.11) in 1H22, compared to EPS of \$0.01 in 1H21.

Finances

In 1H22, the cash burn was \$174,000 and working capital increased \$709,000 resulting in cash used in operations of \$883,000. Cash used in operations, capital expenditures, repayment of debt, and payment of contingent consideration resulted in a reduction in cash of \$4.2 million to nearly \$4.7 million at March 31, 2022.

Capital Structure

At March 31, 2022, BLIN had total debt of \$1.3 million (of which \$527,000 was short-term) and a cash balance of nearly \$4.7 million. Total debt consisted of a \$334,000 vendor loan payable that accrues interest at 3% per annually that has principal and interest payable in two lump-sum installments with the loan maturing on February 1, 2023, a

\$193,000 term loan payable that matures on October 10, 2022, and a \$446,000 1.3% term loan payable that matures on April 30, 2027.

In addition, the company has a 4% \$334,000 seller's note (related to a FY21 acquisition) that is payable over five installments and matures on January 1, 2026.

Competitive Landscape

The markets for BLIN's products and services that include software for Web content management, eCommerce platform software, eMarketing software, Web analytics software, Apps, and digital engagement services are highly competitive, fragmented, and rapidly changing. The barriers to entry are relatively low with the markets being significantly affected by new product introductions. Competition can be intense with the introduction of new technologies and market participants. The industry is constantly evolving and competition is likely to increase in the future. The primary competitive factors within the industry include platform integration, product functionality, ease of use, scalability, open architecture, cost of ownership, integration with third-party applications and data sources, and name recognition and brand reputation.

While competitors typically offer their Web application software as a single point of entry type, BLIN's eCommerce360 offerings provide enterprise customers integrated software with an architecture that is flexible and capable of being deployed in either a Cloud/SaaS or dedicated server environment.

Some competitors within the industry that likely have greater financial resources than BLIN include HubSpot, Constant Contact, Shopify, SAP, Adobe, Unbxd, and Nosto.

Risks

In our view, these are the principal risks underlying the stock.

Accumulated Deficit

At March 31, 2022, the company's accumulated deficit was \$80.1 million, up from \$61.8 million in FY17 (ended September 30). However, Bridgeline Digital, Inc. had its first operating profits of \$150,000 and \$164,000 in 3Q20 and 4Q20, respectively, with an operating profit in FY21 (excluding acquisition and restructuring costs) of \$52,000. In FY22, we anticipate an operating loss of \$2.3 million, which should narrow to \$1.1 million in FY23. We forecast FY22 and FY23 cash earnings (combined) of \$193,000. If operating profits or cash earnings do not occur, it could result in the company's inability to execute its growth strategy and diminish its operations.

Dilution

The common stock offerings made in February 2021 and May 2021, as well as the exercise of common stock warrants and convertible preferred stock, increased common shares outstanding to 10.2 million at May 9, 2022 from 4.4 million at August 10, 2020.

The company has warrants and options that could be exercised into shares of common stock of 1.8 million and 693,000, respectively.

Global Health and Politics

A disruption of global economic conditions due to COVID-19 and/or war-like conditions in Eastern Europe that cause Western nations to impose economic sanctions against Russian banks and Oligarchs, could result in disruptions of economic activity that in turn could adversely impact the company's corporate operating results.

Intellectual Property

The company relies on a combination of copyright, trademark and trade secret laws, as well as licensing agreements, third-party non-disclosure agreements and other contractual measures to protect its intellectual property rights. These protections may not be adequate to prevent competitors from copying or reverse-engineering BLIN's products or competitors independently developing technologies that are similar or superior to its technology. To protect trade

secrets and other proprietary information, employees, consultants, advisors and collaborators are required to enter into confidentiality agreements.

Policing unauthorized use of the company's products may be difficult and litigation could become necessary in the future to enforce its intellectual property rights. Any litigation could be time consuming and result in substantial diversion of management's attention and resources that could diminish operations and finances.

Hosting Services

The company hosts its cloud Software-as-a-Service and manages hosting customers via a third-party, Amazon Web Services. Any interruptions in its services might reduce revenue, as well as cause customer credits and or refunds to be issued. These issues could reduce the company's customer renewal rate.

Cyber Security

Security breaches could expose the company to a risk of loss of its customers' information, litigation and possible liability. While security measures are in place, they may be breached as a result of third-party action, including intentional misconduct by computer hackers, employee error or malfeasance and result in someone obtaining unauthorized access to BLIN's information technology systems, customers' or its own data, including intellectual property and other confidential business information.

While BLIN relies on encryption and authentication technology from third parties, the technologies used may not be sufficient to protect transmission of confidential data. Any liability issues not covered by insurance or that is in excess of insurance coverage could harm BLIN's reputation, business, and operating results.

Integration of Acquisitions

Since 2000, the company has acquired multiple businesses. Future acquisitions could involve substantial investment of funds or financings, as well as resulting in related expenses and also the potential to either dilute the interests of existing shareholders or result in the issuance or assumption of debt. Future acquisitions may require management's time and effort to generate revenues and operating profits that could take away from existing operations.

Shareholder Control

Officers and directors own approximately 6.2% of the company's outstanding voting stock (includes Michael Taglich – Director and President of Taglich Brothers, Inc.) based on BLIN's proxy filing on February 14, 2022. Collectively this ownership could potentially greatly influence the outcome of matters requiring stockholder approval. These decisions may or may not be in the best interests of the other shareholders.

Miscellaneous Risk

The company's financial results and equity values are subject to other risks and uncertainties, including competition, operations, financial markets, regulatory risk, and/or other events. These risks may cause actual results to differ from expected results.

Trading Volume

In 2021, average daily volume was approximately 3 million. Average daily volume decreased over the last three months (ending May 16, 2022) to approximately 112,700. BLIN has a float of approximately 9 million shares and outstanding shares of 10.2 million.

(NYSE: SHOP)
(NYSE: ADBE)

Meaning of Ratings

Buy – The growth prospects, degree of investment risk, and valuation make the stock attractive relative to the general market or comparable stocks.

Speculative Buy – Long-term prospects of the company are promising but investment risk is significantly higher than it is in our BUY-rated stocks. Risk-reward considerations justify purchase mainly by high risk-tolerant accounts. In the short run, the stock may be subject to high volatility and could continue to trade at a discount to its market.

Neutral – Based on our outlook the stock is adequately valued. If investment risks are within acceptable parameters, this equity could remain a holding if already owned.

Sell – Based on our outlook the stock is significantly overvalued. A weak company or sector outlook and a high degree of investment risk make it likely that the stock will underperform relative to the general market.

Discontinued – Research coverage discontinued due to the acquisition of the company, termination of research services (includes non-payment for such services), diminished investor interest, or departure of the analyst.

Some notable Risks within the Microcap Market

Stocks in the Microcap segment of the market have many risks that are not as prevalent in Large-cap, Blue Chips or even Small-cap stocks. Often it is these risks that cause Microcap stocks to trade at discounts to their peers. The most common of these risks is liquidity risk, which is typically caused by small trading floats and very low trading volume which can lead to large spreads and high volatility in stock price. In addition, Microcaps tend to have significant company-specific risks that contribute to lower valuations. Investors need to be aware of the higher probability of financial default and higher degree of financial distress inherent in the microcap segment of the market.

From time to time our analysts may choose to withhold or suspend a rating on a company. We continue to publish informational reports on such companies; however, they have no ratings or price targets. In general, we will not rate any company that has too much business or financial uncertainty for our analysts to form an investment conclusion, or that is currently in the process of being acquired.
