Super League Enterprise, Inc., headquartered in Santa Monica, CA, is a strategically-integrated publisher and creator of in-game advertising brand programs within games and experiences across immersive digital platforms. The company provides a complete range of development, distribution, monetization, and optimization capabilities that are designed to engage users through digital advertising and branding programs with the goal of helping brands change their dot com experience.

Key Investment Considerations:

Maintaining our Speculative Buy rating but reducing our twelve-month price target to \$3.50 per share from \$4.75 per share due primarily to a reduction in our 2025 sales per share forecast.

Super League has substantial growth potential for its integrated end-to-end in-game advertising and branding technology platform programs within games and experience across immersive virtual world gaming and social gathering venues. The in-game digital advertising market is projected to reach \$46 billion by 2027, up from an estimated \$33 billion in 2023 for annualized growth of 9.1%.

Supporting our forecasts is obtaining six seven-figure deals in 1H24, as well as entering 2H24 having a customer pipeline that includes 51 repeat customers and 68 new customer logos. The company continues to streamline operations to reduce costs and deepen existing relationships.

In 2Q24, SLE reported (on 4-14-24) a loss per share of (\$0.60) on revenue of \$4.1 million. In 2Q23, revenue was \$5.1 million with a loss per share of (\$3.38). We projected a loss per share of (\$0.49) on revenue of \$6 million.

For 2024, we project a net loss per share of (\$1.30) on revenue growth of 15.7% to \$29 million. We previously forecasted a net loss per share of (\$1.52) on revenue of \$33.5 million. Our reduced revenue forecast reflects 2Q24 results. Our loss per share forecast reflects cost cutting and streamlining initiatives, as well as a higher than anticipated average share count of 8.3 million compared to our prior share count forecast of 6.3 million.

For 2025, we project a net loss per share of (\$0.36) on revenue growth of 42.9% to \$41.5 million. We previously forecasted a net loss per share of (\$0.37) on revenue of \$46 million. Our forecast reflects the pipeline of customer partnerships with new and existing customers. Our loss per share forecast anticipates operating expense margin improving to 61.5% from an estimated 83.4% in 2024.

Please view our Disclosures on pages 16 – 18.

Appreciation Potential

Maintaining our Speculative Buy rating but reducing our twelve-month price target to \$3.50 per share from \$4.75 per share due primarily to a reduction in our 2025 sales per share forecast. Our rating and price target reflects the company’s ability to leverage its existing customer brand partners such as Visa, Toyota, Kraft, Mattel, Chipotle, Clarks, Disney, Netflix, and PacSun. Further support should occur from recent virtual world deployments and campaigns such as Hamilton the Broadway Show, a UAE specific virtual tourism program, the opening in 2Q24 of a virtual store for Skechers, and a revitalization program for Claire’s, as well as programs for the International Olympic Committee, Maybelline, Google, and Universal Pictures. These relationships should begin to tilt revenue towards annual sales compared to episodic sales, which overtime should reduce seasonality and increase margins.

Supporting our rating and price target is obtaining six seven-figure deals in 1H24, as well as entering 2H24 having a customer pipeline that includes 51 repeat customers and 68 new customer logos. The company continues to streamline operations to reduce costs and deepen existing relationships.

Our 12-month price target of \$3.50 per share implies shares could more than triple over the next twelve months. According to finviz.com, the average price-to-sales multiple for companies in the electronic gaming and multimedia, internet content and information, and application software sectors is 1.9X (prior was 1.6X), compared to Super League’s trailing price-to-sales multiple of 0.2X (unchanged). We anticipate investors are likely to accord SLE a multiple at the midpoint between the sector and its trailing price-to-sales multiple due to projected sales growth of 42.9% in 2025. We applied a price-to-sales multiple of 1.1X (prior was 0.9X) to our 2025 sales per share forecast of \$3.83 (prior was \$6.91), discounted for execution and dilution risks, to obtain a year-ahead price target of approximately \$3.50 per share.

SLE’s valuation should improve as it reports revenue growth, operating losses narrowing, and cash burn is reduced. We forecast revenue growth of 42.9% to \$45.1 million in 2025 from an estimated \$29 million in 2024. We anticipate the company reducing its operating losses and swing to an operating profit of \$685,000 in 4Q24, which should increase to nearly \$3 million in 4Q25. In 2025, SLE’s cash loss should narrow to \$90,000 from estimated cash burn of \$7.3 million. In 2023, cash burn was \$15.6 million.

We believe Super League is most suitable for high-risk tolerant investors seeking exposure to an emerging growth company providing in-game advertising and branding programs for its customer brand partners and partnerships within immersive virtual worlds and virtual social gathering venues.

Overview

Super League Enterprise, Inc., headquartered in Santa Monica, CA, is a strategically-integrated publisher and creator of games and experiences across immersive virtual digital platforms. The company is trusted by customer brand partnerships (see chart on the right) with a complete range of development, distribution, monetization, and optimization capabilities that are designed to engage users through dynamic and energized programs. SLE utilizes its publishing engine technology for the immersive Web in order to help brands change their dot com experience.

Super League through their innovative solutions and integrated publishing engine provides at scale access to audiences who gather in immersive digital and virtual spaces to socialize, play, explore, collaborate, shop, learn and create.

The company’s mission is to drive the creation, growth, and monetization of digital experiences across the wider virtual immersive Web landscape through its publishing engine technology and service offerings that was enhanced

by the May 2023 acquisition of SL Studios. The company has its own and third-party virtual publishing worlds, experiences and destinations that provide marketing solutions for its customer brand partners.

The global immersive platforms used by SLE to accelerate its intellectual property and audience success for its digital advertising services include Roblox (the ultimate virtual universe where games are called experiences allows users to play and create games, and chat with others online within and immersive gaming, social media, and social commerce venue), Minecraft (a brand name for a sandbox video game with construction, crafting, exploration, and combat mechanics, available on many game platforms) and Fortnite (a player-versus-player game for up to 100 players, allowing one to play alone, in a duo, or in a squad) to the popular next generation Web environment platform such as Sandbox, LandVault, and Decentraland.

We anticipate the company will continue its development and deployment of its multiverse technology capabilities that are focus on publishing original and custom 2D and 3D worlds and experiences, providing marketing solutions for brands and advertisers, as well as tools and services for creators and builders across gaming platforms and applications across the immersive Web-based platforms. These actives should be enhanced by joining the Roblox's partner program in August 2023. This partner program should elevates SLE's offerings within the official Roblox advertising eco-system with immersive advertising. The benefits to joining the partner program include access to educational resources and training, along with tools and broader insights for brand onboarding.

Platforms

Super League designs, builds, and provides the platforms for a creator and players' journey in a virtual immersive Web-based gaming venue in order to provide innovative ways for brands and advertisers to engage with those creator and player audiences. SLE accesses players and creators through their network of virtual digital game worlds and content channels. Super League's proprietary cloud-based platforms combine its advertising technology and brand publishing engine, metaverse game experience, and technology to run tournaments, as well as fully remote production and livestream broadcast technology. Additional platform offerings include enabling digital tools for scale that will allow for data service analytics, search engine optimization, and email and mobile marketing.

SLE has develop and integrated acquisitions into proprietary suite of metaverse media products and analytics that connects brands and advertisers to hundreds of Roblox games and own extensive Minecraft audiences.

Through the company's owned and partner platforms and virtual immersive Web venues its customer brand advertisers can reach tens of millions of monthly metaverse players in-game through a distributed game world network and hundreds of millions of viewers in-stream distributed across social media channels including YouTube, TikTok and Instagram. This enables Super League to strategically customize brand integrations and content that provides a client with campaign analytics and insights to gain insight on brand awareness and the impact on consumers. The company's technology platforms provide its customer brand partners turnkey metaverse advertising products that are a progressive and differentiated way for advertisers to embed natively into games through dynamic digital billboards, interactive 3-D characters, and portals to gain access to their target demographic audience by enhancing the gaming experience without interrupting the play itself.

Growth Strategy

Super League's core growth strategy revolves around expanding virtual digital in-game advertising opportunities for it customer brand partners through its expanding technology platforms and network of immersive game experience venues, which resides within the global metaverse (the next iteration of the internet). The metaverse market is projected to exceed \$936 billion by 2030 from an estimated \$82 billion in 2023. The metaverse has at least 400 million active monthly users that engage on gaming platforms such as Roblox, Fortnite, and Minecraft.

SLE's revenue growth strategy is to monetize audience reach within its existing metaverse (open-world) game platforms. This should accomplished through acquisition, partnerships, and increasing deployment of virtual immersive worlds through customer brand partner relationships reflecting the application of the company's smart technology backbone to extended reach and diversification of revenues.

Partners

The company should continually be developing and engaging with partners to build its offerings to a larger audience that should be key to obtaining new customer brand partners and deepening relationships with existing customers. In 2023, two significant partnerships achieved were with Roblox and LandVault. SLE joined the Roblox partner program, which will boost its offerings to include the official Roblox advertising system with immersive ads. Additional benefits include having access to Roblox's audience reach and dynamic marketing content along with Roblox's own ad inventory, as well as receive customer brand referrals.

SLE established a strategic partnership with LandVault (the largest construction company in the metaverse) to create an alliance to provide brands with scalable solutions and bridge the gap between Web2 and Web3. The partnership launched programs in the UAE specific to virtual tourism, which is likely to be a year-long deployment. The company sees this partnership bringing significant opportunities in this vertical and others across the greater Gulf Cooperation Council countries (Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Bahrain, and Oman).

In August 2024, Super League announced a strategic partnership with Meta-Stadiums to combine capabilities and offer cross-platform immersive experiences and events to music artists, sports teams, entertainment companies, and consumer brands. Meta-Stadiums is the development company behind the premium immersive platforms MVB Worlds, Meta-Stadiums, MetaJam metaverse concerts, and Meta-Mall.

New Engagements

The company is striving to build longer-term customer engagements compared to episodic or short-term campaigns. If successful this strategy should reduce seasonality, enhance margins through better leverage utilization, and build even steeper relationships.

In 3Q24, Super League announced an engagement with Old Navy. The pop-up store product for Old Navy allows players the opportunity to shop for digital twin fashions of current in real life clothing in stores during the back-to-school shopping season. Also, the company launched a first of its kind event featuring a Post Malone hybrid (live and virtual) concert hosted at the Louvre Museum and streamed live onto Roblox reaching over 170 countries around the world. Players had the ability to explore the virtual Louvre Museum Experience to learn and interact with a collection of curated artwork such as the Mona Lisa. This engagement was followed by the launch of Olympic World, a global experience on Roblox to unite Olympic fans in partnership with Visa and the International Olympic Committee.

In 2Q24, SLE announced a partnership with Skechers to open its first virtual store through an immersive experience in Roblox Livetopia's Topia Mall. The Skechers shop is designed to build community and engage young consumers in a world that brings their brand to life. Also, Super League announced a program with retailer Claire's to revitalize their virtual world called Shimmerville, which is a persistent experience that serves as a hub for the discovery of new avatar items, as well as original character-driven IP. In addition, the company debuted SOUNDZ, a new scalable immersive music offering that provides for a creative concert experience including listening parties, dance moves and digital merchandise. This launched with Bebe Rexha's custom-built avatar set to dance and engage with fans through games, try-on and purchase virtual gear and other rewards while debuting her new singles.

Acquisition Strategy

The company seeks to acquire companies and assets in accretive transactions in order to increase its technology offerings, customer base, and virtual world platforms. In 2023, Melon (rebranded into SL Studios), a development studio that builds virtual worlds in partnership with consumer brands across music, film, television, and sports, as well as fashion and youth culture. This acquisition positioned the company as a one-stop solutions provider and strategic operating partner for marquee brands and businesses seeking to expand and activate communities throughout the gaming metaverse and immersive Web.

Longer-term

Super League's longer term strategy includes providing customers with data analytics and targeted demographics of users. This type of offering will be designed to save a customer brand partner time and investment dollar prior to a product or brand launch in the physical world. Other long-term strategic objectives includes deepening its owned

game worlds in order to grow direct to consumer revenues, increase average advertiser deal-size in term of budget and length of engagement by using its publishing, media and creator tool suite.

Projections

Basis of Forecast

Our forecast reflects the revenue generating opportunities from the company's ability to obtain new customer brand partners, deepen relationships with existing customer brand partners, and creation of advertising and branding monetization programs.

We anticipate the company's audience reach combined with its end-to-end solutions can enable the taking of an increasingly greater share of advertisers' branding dollar budgets with new and existing customers. SLE has a repeat buying or customer retention rate in excess of 70%, with an average pipeline deal size that is approaching \$500,000. Our forecast includes deployment of programs from its new brand and partners, as well as its existing 100+ brands and IP owners. Entering 2H24, the company has a customer pipeline that includes 51 repeat customers and 68 new customer logos.

Based on 1Q24 results and February 29, 2024 sale of its Minehut direct to consumer assets, we anticipate a significant reduction and rationalization of operating expenses beyond our prior expectations through 2025. The annualized cost reduction just from the sale of Minehut is approximately \$2.5 million beginning in 2Q24.

We are not forecasting (only recording what SLE reports) income tax expense as the company has (as of December 31, 2023) US federal, state, and foreign net operating loss carryforwards of approximately \$130 million, \$117.5 million, and \$1.1 million, respectively, expiring through 2043.

Economy

In July 2024, the International Monetary Fund (IMF) revised its global economic growth estimates to 3.2% for 2024 and 3.3% for 2025. In April 2024, the IMF's prior projection called for growth of 3.2% in 2024 and 3.2% in 2025.

The IMF revised its economic growth estimate for the US to an increase of 2.6% for 2024 and 1.9% for 2025. In April 2024, the IMF projected US economic growth of 2.7% and 1.9% for 2024 and 2025, respectively.

Operations 2024

We project total revenue growth of 15.7% to \$29 million (prior was \$33.5 million) reflecting 1H24 results and a pipeline of customer partnership deals from new and existing relationships. The decrease in our forecast reflects lower than anticipated revenue contributions from the media and advertising segment as customers are shifting and delaying deployment schedules.

We forecast gross profit increasing 42.7% to \$14 million from \$9.8 million in 2023 due primarily to revenue growth and gross margin expansion to 48.1% from 39% in 2023. Gross margin improvement should occur as the company executes on higher margin recurring revenue type customer brand partnership projects and the ability to use previously built technology for new projects.

We expect core operating expenses to decrease by approximately \$9.1 million to \$24.2 million from \$33.3 million (excluding impairment charges) in 2023. We anticipate a continued reduction in engineering, technology and development expenses to \$4.1 million from \$9.5 million in 2023 reflecting the ability to leverage prior development programs into new customer deployments and sales of Minehut at the end of 1Q24. G&A expenses should decrease to \$9.9 million from \$10.3 million in 2023 as streamlining of the company's internal infrastructure continues in 2024 and selling, marketing and advertising expenses decreasing to \$10.1 million from nearly \$12.5 million in 2023 after finding the appropriate spending level to continue supporting and developing new and existing customer partnerships.

We project operating losses narrowing to \$10.2 million from \$23.5 million in 2023 (excluding impairment charges). The improvement reflects revenue growth, gross margin expansion, and operating expense margin improving to

83.4% compared to an estimated 132.7% excluding items. We anticipate non-operating income of \$983,000 compared to income of \$2.2 million in 2023.

We project a net loss of \$10.8 million or (\$1.30) per share, after preferred dividends of \$1.6 million on average shares of 8.3 million. We previously projected a net loss of \$9.5 million or (\$1.52) per share on average shares of 6.3 million. Our bottom line forecast stems from expense reductions occurring faster than previously anticipated, more than offset by the inclusion of preferred dividends recorded in 2Q24.

We forecast 2024 cash burn of \$7.3 million and a decrease in working capital of \$542,000 resulting in cash used in operations of \$6.8 million. We estimate proceeds from the issuance of preferred stock is unlikely to cover cash used in operations and capitalized software development costs. We anticipate cash decreasing by \$6.6 million to nearly \$1 million at December 31, 2024.

Operations – 2025

We project total revenue growth of 42.9% to \$41.5 million (prior was \$46 million) reflecting a pipeline of customer partnership deals and expansion of its professional sales team, partly offset by a slower than previously anticipated deployment schedule.

We forecast gross profit increasing 54.9% to \$21.6 million from an estimated \$14 million in 2024 due primarily to revenue growth and gross margin expansion to 52.2% from an estimated 48.1% in 2024. Gross margin improvement should occur as the company executes on higher margin recurring revenue type customer brand partnership projects and continued deployment of previously developed technology on future projects.

We expect operating expenses to increase by \$1.3 million to \$25.5 million from an estimated \$24.2 million in 2024. We anticipate engineering, technology and development expenses decreasing to \$2.9 million from an estimated \$4.1 million in 2024 reflecting a full year of cost reductions from the sale of Minehut, partly offset by spending to support new sophisticated customer partnership programs. G&A expenses should increase to \$11.4 million from an estimated \$9.9 million in 2024 and selling, marketing and advertising expenses should increase to \$11.3 million from an estimated \$10.1 million in 2024 with both categories supporting customer and revenue growth.

We project operating losses narrowing to \$3.9 million from an estimated \$10.2 million in 2024 due primarily to revenue growth, gross margin expansion, and operating expense margin improving to 61.5% from an estimated 83.4% in 2024. We anticipate non-operating income or expense to be zero.

We project a net loss of \$3.9 million or (\$0.36) per share on average shares of 10.8 million. We previously projected a net loss of \$2.5 million or (\$0.37) per share on average shares of 6.7 million.

We forecast 2025 cash loss of \$90,000 and an increase in working capital of \$492,000 resulting in cash use in operations of \$582,000. We estimate proceeds from the issuance of preferred stock is unlikely to cover cash used in operations and capitalized software development costs. We anticipate cash decreasing by \$182,000 to \$820,000 at December 31, 2025.

Brand Programs

The company deploys its advertising and marketing technology platform offerings for its customer brand partners on Roblox, Sandbox, and Decentraland. Roblox's virtual world platforms are designed to reimaging the way people come together so that every day, tens of millions of people around the world connect, communicate and explore millions of immersive experiences together with their friends. All of these experiences are built by the Roblox community, made up of millions of creators. The Sandbox is a virtual world where globe players can build, own, and monetize their gaming experiences. In addition to gaming experiences, Sandbox provides social hubs where players can meet and make friends as they explore virtual experiences. Decentraland is a decentralized virtual reality platform where users can create, experience, and monetize their content and applications.

Some successfully deployed brand programs were from customer brand partners Kraft Heinz, Mattel and Chipotle.

In 2H23, the company deployed its largest customer partnership deal for Kraft Heinz's Kraft Lunchables that generated revenue of nearly \$4 million. For the program, SLE built a technology infrastructure that connected consumers to physical retail and QR codes on packaging, so and it has a rewards loop that feeds from digital to physical and back to digital (pictured on the right).

SLE leveraged the power of Roblox's to bring Mattel's Barbie's 60th Anniversary of her Dream House to an immersive Web-based audience of Barbie Lovers, while engaging in innovative and uniquely interactive in-game experiences that generated purchases in real life. The results of the Barbie's Dreamhouse 60th anniversary thirty-day deployment to a global audience resulted in over 60 million visits to the Dreamhouse with 81% more likely to prefer Barbie over the competition and a 117% increase in the likelihood of recommending Barbie. Most importantly, the estimated value delivered to Mattel was approximately \$688,000 compared to a budget of \$200,000.

The company's SL Studios a game development studio and innovators in creating valuable partner solutions is the second example of what the company should be able to accomplish for its customer brand partners. SL Studios help develop a Chipotle activation deployment that proved immersive game experiences can be a driver for downloading apps and increasing retail foot-traffic. The program generated approximately 4.6 billion total impressions.

Having SL Studios incorporated into the company's end-to-end solutions offerings should help drive additional customer brand partnerships to seek to drive immersive game player into the real in person environment to spend money on real products experienced in the virtual game world. We anticipate these two examples should help drive future brand program to have increased budgets and occur over longer periods of time, which could translate into diminishing historical seasonal revenue trends for the company and increase operating leverage by reducing deployment times.

Market Briefs

Digital and In-Game Advertising and Marketing

ResearchAndMarkets published a report on the global market for digital advertising that projects revenue to at least \$1.1 trillion by 2030, up from \$365 billion in 2022 for annualized growth of 15.5%. Fueling growth is the integration of technologies, such as Artificial Intelligence, analytics, and machine learning.

Statista (provider and data and market statistics) predicts revenue for in-game digital advertising to reach \$169.4 billion by 2029, up from an estimated \$109.6 billion in 2024 for annualized growth of 9.1%. The growth and market forecast reflects growing popularity of social and mobile gaming and advantages like inexpensive advertising, greater reach and return on investment, quick integration, and straightforward ad settings in social gaming.

Metaverse

An article published by Influencer Marketing Hub, indicated that global metaverse market could reach over \$936 billion by 2030, up from an estimated \$82 billion in 2023. The article (published in July 2023) estimated that the metaverse has in excess of 400 million active users every month, many are young teenagers with the most popular destinations being immersive games on Roblox, Fortnite, and Minecraft. It is anticipated that most companies investing in the metaverse have identified big companies, men, and Gen Z as their primary target audience.

2Q24 and 1H24 Financial Results

2Q24

SLE reported revenue decreased 18.5% to \$4.1 million from nearly \$5.1 million in 2Q23. The revenue decrease stemmed from approximately \$1.8 million in delayed advertiser launch dates from 2Q24 to 3Q24, meaning the

Super League Enterprise, Inc.

revenue was delayed not lost. The overall decrease in revenue included a decrease in media and advertising revenue to \$1.7 million from \$2.5 million in 2Q23. The lower media and advertising revenue reflected a \$714,000 decrease in on-platform related media sales revenue and \$381,000 decrease in Minehut related media sales, partly offset by a \$219,000 increase in influencer marketing revenue and a \$124,000 increase in off-platform related media sales. Also, direct to consumer revenue decreased \$209,000 to \$178,000 from \$387,000 in 2Q23 stemming from the sale of Minehut Assets in 1Q24.

Partly offsetting the revenue decrease was growth in publishing and content studio revenue of \$45,000 to \$2.2 million. Overall revenue from this segment included immersive experience projects for global brands such as the International Olympic Committee, Visa, Inc., Maybelline, Claire's, Skechers, Google, Inc., and Universal Pictures.

Gross profit decreased 23.1% to \$1.6 million from \$2.1 million last year due primarily to lower revenue and gross margin compression to 40% from 42.4% in 2Q23. Gross margin compression reflects a slightly higher average direct cost profile for influencer marketing programs.

Core operating expenses decreased to \$5.9 million from \$7.5 million last year. Engineering, technology and development expenses decreased to \$792,000 from \$2.2 million reflecting reduced cloud services and other technology platform costs of \$397,000 and lower product and engineering personnel costs of \$513,000 stemming from the impact of ongoing cost reduction and optimization activities that included the sale of Minehut assets in 1Q24. Selling, marketing and advertising expense decreased to \$2.6 million from \$3 million in 2Q23 due primarily to a reduction in amortization expense related to the write-down of intangible assets. G&A expense increased to \$2.5 million from \$2.3 million last year due primarily to non-cash professional fees, partly offset by the company's cost reduction and optimization activities.

Non-core operating activities included a positive adjustment of \$206,000 related to contingent consideration. In the year-ago period non-core operating activities included a negative adjustment of \$540,000 related to contingent consideration and \$2.3 million related to loss on intangible asset disposal.

The company's operating loss was \$4.1 million compared to a loss of \$8.2 million (including non-core activities) in the year-ago period. The improvement reflects lower core operating expenses.

Non-operating income was \$1.6 million compared to income of \$1 million last year. The current period included a nearly \$1.7 million positive change in fair value of warrant liability, partly offset by interest expense of \$15,000, and other loss of \$14,000. The year-ago period included a \$1 million positive change in fair value of warrant liability and interest expense of \$2,000.

Net loss was \$4 million or (\$0.60) per share, after preferred dividends of \$1.6 million, on 6.7 million average shares compared to a net loss of \$6.8 million or (\$3.38) per share on 2.2 million average shares in the year-ago period. We projected a loss per share of (\$0.49) on revenue of \$6 million.

1H24

SLE reported revenue decreased by \$49,000 to \$8.3 million from \$3.4 million in 1H23. The revenue decrease stemmed from approximately \$1.8 million in delayed advertiser launch dates from 2Q24 to 3Q24.

Gross profit decreased 4% to \$3.4 million from \$3.5 million in the year-ago period due primarily to gross margin compression to 40.6% from 42% in 1H23. Gross margin compression reflects a slightly higher average direct cost profile for initial revenue generating and influencer marketing programs.

Total operating expenses decreased 36.2% to \$12.1 million from nearly \$19 million last year reflecting reduced cloud services

	in \$ thousands

and other technology platform, lower product and engineering personnel costs, and initiatives continuing from cost reduction and optimization activities that included the sale of Minehut assets in 1Q24. The current period, included non-core operating activities of a negative \$53,000 related to contingent consideration. In the year-ago period non-core operating activities included a negative adjustment of \$1 million related to contingent consideration and \$2.3 million loss on intangible asset disposal.

The company's operating loss was \$8.7 million compared to a loss of \$15.4 million in the year-ago period. The improvement reflects lower core operating expenses.

Non-operating income was \$983,000 compared to income of \$1 million last year.

Net loss was \$9.3 million or (\$1.55) per share, after preferred dividends of \$1.6 million, on 6 million average shares compared to a net loss of \$14.1 million or (\$7.20) per share on 2 million average shares in the year-ago period.

Finances

In 1H24, cash burn of \$6.2 million and a decrease in working capital of \$129,000 resulted in cash used in operations of \$6.1 million. Proceeds from the issuance of preferred stock did not covers cash used in operations, software development costs, and repayment of receivables facility. Cash decreased by \$5.9 million to \$1.7 million at June 30, 2024.

Capital Structure

At June 30, 2024, SLE had outstanding a \$199,000 secured accounts receivable facility, accrued contingent consideration liabilities of \$2.1 million, and shareholders' equity of \$5.1 million. The company also has preferred stock outstanding of 22,858 shares that can be converted into more than 8.1 million common stock (at conversion prices ranging from \$7.60 to \$13.41 per share).

On July 10, 2024, the company entered into subscription agreements with accredited investors for the sale of an aggregate of 551 shares of newly designated Series AAA-2 Junior Convertible Preferred Stock, at a purchase price of \$1,000 per share, for aggregate gross proceeds of approximately \$551,000.

Competitive Landscape

Super League competes for users, developers, and creators within the online immersive Web gaming industry. To be successful SLE needs to attract and retain the attention of users on the basis of content development and experiences for their engagement hours. The competitive environment also involves attracting and retaining developers by providing tools that enable easy to build, publish, operate, and monetize content. Therefore, there is substantial competition for developers and engineering talent that have gaming and metaverse platform experience.

Super League's current and potential future competitors could have advantages, such as larger sales and marketing budgets, broader and more established relationships with users, developers, and creators, as well as the resources to make acquisitions and enter into strategic partnerships. The company anticipates competition will increase due to technological advancements, the emergence of new entrants into the market, continuing market consolidation, as well as changing developer, creator and user preferences.

In this industry there are a wide number of participates that include global technology leaders such as Amazon, Apple, Meta Platforms, Google, Microsoft, and Tencent, as well as global entertainment companies such as Comcast, Disney, and Paramount, along with online content platforms including Netflix, Spotify, and YouTube and social platforms such as Facebook, Instagram, Pinterest, and Snap.

Risks

In our view, these are the principal risks underlying the stock.

Operating Losses

Super League has not generated an operating profit. At June 30, 2024, the company's accumulated deficit was approximately \$258.3 million, up from \$85.8 million in 2019. Operating losses are likely to continue but diminish through our forecast period to \$3.9 million in 2025 from \$20.7 million in 2019. The lack of operating profits could result in the company's inability to execute its growth strategy and diminish its operations. Common and preferred stock offerings have provided proceeds in excess of \$100 million since 2019.

Dilution

In 4Q22, 2023, and through July 2024, SLE entered into subscription agreements with accredited investors in connection with the sale and issuance of approximately 23,000 shares of newly created convertible preferred stock. Common shares issuable upon conversions could exceed 8.1 million common shares. In August 2023, Super League issued common shares for net proceeds of approximately \$1.8 million in an underwritten public offering. While we are not forecasting additional capital raised through our forecast period, the company could be seeking additional funding in order to grow operations or complete acquisitions, which would likely dilute existing shareholders.

Integration of Acquisitions

Since 2021, the company has acquired multiple businesses. Future acquisitions could involve substantial investment of funds or financings, as well as resulting in related expenses and also the potential to either dilute the interests of existing shareholders or make significant earn-out payments. Future acquisitions may require management's time and effort to generate revenues and operating profits that could take away from existing operations.

Technology

Rapid technology changes will require SLE to anticipate what it must be developed in order to take advantage of and remain competitive in both the content-creation and the delivery of in-game advertising. Investments involved in staying at the forefront of content creation and in-game advertising involve risks and uncertainties with no assurance that those technology investments be successful. If investments in new technologies are unsuccessful the company's reputation may be negatively impacted, as well as diminish its financial condition and operating results.

Intellectual Property

SLE develops and owns various intellectual properties, including pending and issued trademarks, patents, and copyrights, as well as the obtaining of licenses to intellectual property with game publishers. Entering 2024, the company had one pending patent application and five issued patents, and various trademark applications.

Cyber Security

SLE's operations face cyber risks and threats that seek to damage, disrupt, and/or gain access to its networks and platform, supporting infrastructure, intellectual property, as well as other assets. Any failure to prevent, mitigate, or respond to security breaches could result in interruptions to the company's platform, degrade the user experience, cause users and creators to lose confidence in its technology platforms, and incur legal and financial exposure.

Shareholder Control

Officers and directors collectively own or have a controlling interest in 5.4% of the company's outstanding voting common stock and additionally one shareholder owns 18.9% of the company's outstanding voting common stock as of a July 2023 Proxy filing. Collectively this ownership could potentially greatly influence the outcome of matters requiring stockholder approval. These decisions may or may not be in the best interests of the other shareholders.

Other Risk Factors

Investors should be aware of additional risk factors that should be considered. **An evolving revenue generation model, a lack of definitive license agreements with game publishers for the use of certain game titles played, an ability to follow laws and regulations, as well as seasonality** that can impact quarterly results. All these other factors could negatively impact the company's operations that could diminish growth initiatives and financial results.

Miscellaneous Risk

The company's financial results and equity values are subject to other risks and uncertainties, including third party, competition, operations, financial markets, regulatory, legislative, status as an emerging growth company, Web-based activities, and/or other events. These risks may cause actual results to differ from expected results.

Trading Volume

Average daily trading volume was 349,000 in 2023. Over the last three month ending August 16, 2024, average daily trading volume decreased to 86,900. Super League has a float of 5.3 million shares and outstanding shares of 10.6 million as of August 9, 2024.

Roblox Corporation (NYSE: RBLX)

Comcast Corporation (NASDAQ: CMCSA)

Paramount Global (NASDAQ: PARA),

Spotify Technology S.A. (NYSE: SPOT)

Meaning of Ratings

Buy – The growth prospects, degree of investment risk, and valuation make the stock attractive relative to the general market or comparable stocks.

Speculative Buy – Long-term prospects of the company are promising but investment risk is significantly higher than it is in our BUY-rated stocks. Risk-reward considerations justify purchase mainly by high risk-tolerant accounts. In the short run, the stock may be subject to high volatility and could continue to trade at a discount to its market.

Neutral – Based on our outlook the stock is adequately valued. If investment risks are within acceptable parameters, this equity could remain a holding if already owned.

Sell – Based on our outlook the stock is significantly overvalued. A weak company or sector outlook and a high degree of investment risk make it likely that the stock will underperform relative to the general market.

Discontinued – Research coverage discontinued due to the acquisition of the company, termination of research services (includes non-payment for such services), diminished investor interest, or departure of the analyst.

Some notable Risks within the Microcap Market

Stocks in the Microcap segment of the market have many risks that are not as prevalent in Large-cap, Blue Chips or even Small-cap stocks. Often it is these risks that cause Microcap stocks to trade at discounts to their peers. The most common of these risks is liquidity risk, which is typically caused by small trading floats and very low trading volume which can lead to large spreads and high volatility in stock price. In addition, Microcaps tend to have significant company-specific risks that contribute to lower valuations. Investors need to be aware of the higher probability of financial default and higher degree of financial distress inherent in the microcap segment of the market.

From time to time our analysts may choose to withhold or suspend a rating on a company. We continue to publish informational reports on such companies; however, they have no ratings or price targets. In general, we will not rate any company that has too much business or financial uncertainty for our analysts to form an investment conclusion, or that is currently in the process of being acquired.
